January 6, 2012

To the Citizens of Fulton County:

The Fulton County Health Department continues to be a strong asset to Fulton County in both services and financial returns. The health department team works very hard to offer a wide variety of services and to be the best that we can be.

We strive to be proactive and meet your needs, as we continually explore new services that we may be able to offer and to seek ways to improve the services we do offer. We provide a wide range of services that benefit literally everyone in Fulton County, yet the health department simply wouldn't exist without your support and utilization. Your decision to use our services ensures that you have the best available care, brings money into Fulton County to help provide jobs and additional services, and minimizes the taxes needed to support many of our services.

In 2006, the I-CARE, Inc. Foundation was formed to enable individuals or organizations to donate funds in a tax deductible manner to contribute to public health and support the mission of the Fulton County Health Department.

I would like to thank all of the volunteers who contribute to our success in important ways, whether they assist with immunizations clinics, administration, or in some other way, their service is greatly appreciated.

I also appreciate the dedication and support of the health department staff, the Board of Health, the area medical professionals, Graham Hospital, and the Fulton County Board. These entities and individuals, along with too many others to mention here, have played a vital role in helping us to continue to serve you to the best of our ability.

Let me assure you that, for FY 2012, we will continue striving to provide the best services possible to enhance the lives of Fulton County residents. If you have suggestions, complaints, or compliments about any of our services, please call me at (309)647-1134 or email me directly at mengland@fultonco.org. I am interested in hearing from you.

Mary E. England, NHD, MS, LD, LEHP
Public Health Administrator

FULTON COUNTY BOARD OF HEALTH

DIVISION OF ADMINISTRATIVE SERVICES

The Administrative Services Division of the Fulton County Health Department includes the Business Office, Office of Human Resources, Low Income Home Energy Assistance Program (LIHEAP), Weatherization, Volunteer, and the Administrator.

The **Volunteer Program** has completed its 17th year with volunteers logging a total of 11,302 hours since its inception. There are 24 active volunteers. Some work on a regular basis; others participate in seasonal events such as clerking for the flu program each fall. Our volunteers have logged 293 hours this year assisting FCHD programs by making copies, folding brochures, compiling packets, answering phones and clerking for flu and health watch clinics.

The Fulton County Health Department Administrator is the official Registrar for Fulton County, responsible for the filing of birth and death certificates. The births and deaths recorded reflect those that occurred within the geographical boundaries of Fulton County.

VITAL STATISTICS FOR FULTON COUNTY

ENERGY ASSISTANCE AND WEATHERIZATION

Approved Energy Assistance Applications 1985
Weatherization Projects (homes) Completed 38

VOLUNTEER PROGRAM

Volunteers 24
Volunteer Hours Donated 293

IPLAN

Health Problem # 1: The incidence of chronic diseases with respect to heart, stroke, lung, cancer, and diabetes account for the greatest number of deaths and hospitalizations in Fulton County.

Health Problem # 2: There is little access to affordable dental care for the low income and medically indigent and inadequate public education on the importance of routine dental care.

Health Problem # 3: Outside stressors contribute to mental health issues. The risk factors include: Child abuse and domestic violence; Substance abuse – especially alcohol; teen pregnancy or unwanted pregnancy.

FULTON COUNTY HEALTH DEPARTMENT DENTAL CENTER

The Fulton County Health Department Dental Center has now been in existence since May 2009. We have four contracted dentists, each serving 1 or 2 days a week. These four dedicated dentists allow us to see small children, do full mouth extractions, provide dentures, as well as the regular preventive and diagnostic services of a dental office.. The clinic has more than justified its existence and recognized the need for such services in our area for those with Medicaid insurance or no insurance. We have a full time office manager, 3 dental assistants, 1 contracted assistant, and a staff hygienist to round out our staff. This staff works to ensure services are provided in a timely manner to an underserved population. With this staff we have been able to expand our services.

Our clinic has become the dental home for Head Start in Fulton County, we continue to contract with Miles of Smiles to bring a dental sealant program into the schools, and have been awarded an outreach grant by the Illinois State Dental Society that will help us to education children and their families and to lessen the anxiety of a visit to the dentist by promoting a "Visit-the-Dentist Day" in the spring time when young children can visit the office without having services done.

The Fulton County Dental center staff is also available for presentations for the purpose of educating the public, health care providers and educators on the importance of good dental hygiene and health.

The dental center looks forward to expanding services and reaching more people who need a dental home as well as educating our community of the importance of good oral health practices for overall health.

DIVISION OF ENVIRONMENTAL HEALTH SERVICES

Protection of the health, safety and welfare of the citizens of Fulton County is the goal of the Fulton County Health Department. The Division of Environmental Health is responsible for the Food Sanitation, Private, Semi-Private, and Non-community Public Water Supplies, Private Sewage Disposal, Solid Waste, Tanning Facilities, Nuisance, Vector, Mobile Home Parks, and Bed and Breakfast Programs.

Continued efforts in the West Nile virus activities included but were not limited to setting 100 gravid traps at 12 sites and conducting tests for West Nile virus on 26 mosquito pools. There were no positive birds tested in Fulton County.

Division Of Environmental Health Statistics December 1, 2010 – November 30, 2011

Private Water Supply Program		Other	
Final Inspections	13	Food Borne Illness Investigations	3
New Well Construction Permits	31	Tanning Facility Permits Issues	9
Water Samples	130	Solid Waste Investigations	4

DIVISION OF FAMILY AND COMMUNITY HEALTH SERVICES

Again in 2011, the Division of Family and Community Health Services acted as the lead agency for the Illinois Breast and Cervical Cancer and WISEWOMAN programs and worked to provide these services through our health department as well as health departments in McDonough and Schuyler Counties. A Susan G. Komen for the Cure grant also provides mammograms to age and income eligible clients and funding for our Breast Cancer Support Group.

In addition to providing services to women, the Prostate and Testicular Education and Screening grant is providing educational programs and outreach to age and income eligible men and encourages them to receive Prostate Specific Antigen (PSA) testing and Digital Rectal Exams (DRE). PSA, DRE and STD clinics serving men provide the community with a dynamic role in the area of Men's Health.

2011 also showed continued funding for Emergency Preparedness. The combined funding solidified our planning for a pandemic flu outbreak, bioterrorism event, or other emergency requiring the cooperation of all responding agencies. In the event of such an event, our agency will be well prepared to work within the context of the entire health community to provide necessary services to the residents of Fulton County.

The division continues to provide services to the educational community. Our School Nurse Program places a nurse in two school districts in the county and provides additional support services to the Regional Office of Education. Other programs in the schools include our Teen Pregnancy Prevention Program, Tobacco Free Communities Program and Hearing and Vision Screenings. Combined, our services touch every school district in Fulton County.

This division also includes many of the traditional programs of the health department including Women's Health, Family Planning, WIC, and Family Case Management, Immunizations and Kid Care. Laboratory

services are also a part of this division, including STD and HIV screening. Health professionals that provide both preventive health care and educational services include program specialists, registered nurses, and Women's Health Nurse Practitioners.

Women's Health clinics include screenings and health education for women of all ages. Women's Health also includes financial assistance for mammograms and pap smears to age and income eligible women who have no insurance. The "Building Better Bones" program works to reduce the incidence of osteoporosis.

The **Maternal Child Health Programs** include the **WIC** supplemental nutrition and education program. Through WIC, income eligible pregnant/postpartum women, infants and children up to five years of age receive nutritious food, nutrition/breastfeeding education, and healthcare referrals. The **Family Case Management** program provides home visits, education, and referrals to pregnant/post-partum women and children. The **Immunization Program** provides vaccines for children and adults. In addition, the Maternal Child Health Programs provide childhood health exams including screenings of blood pressure, hemoglobin, and blood lead levels.

The Fulton County Health Department **Family Planning Program** provides females of child bearing age health education, physical exams, pregnancy testing, contraception including abstinence, laboratory screenings which include pap smears and sexually transmitted disease (STD) testing, breast exams, and referrals. Male services are provided which include education/counseling, exams, STD testing and treatment, and partner services.

Laboratory services include traditional programs of the Health Department including the cardiovascular screening program Health Watch, blood pressure screenings, and Prostate Specific Antigen (PSA) screenings. Through the STD Clinic, **STD** and **HIV** testing, exams, counseling, treatment, partner services and referrals are offered to both men and women.

Also, this division oversees the operations of the Cuba and Astoria sub-offices of the Health Department. Housed in the Grant Keime Memorial Building in Cuba, the Chore Housekeeping and Medications Management Program are shining examples of innovative programs to serve the community. In Astoria we provide many of the traditional health department services including WIC, Immunizations, Family Case Management, Family Planning Supplies, mammogram assistance, water sample kits, death certificates and temporary food permits.

Fulton County Emergency Medical Services
Fulton County Emergency Services and Disaster Agency
Fulton County Farm Bureau
Fulton County Schools
Fulton County Sheriff's Department
Fulton County State's Attorney
Fulton-Mason Crisis Services
Fulton-Schuyler Regional Office of Education
Graham Hospital
Graham Hospital School of Nursing
Graham Medical Services
Illinois State Police – District 14
Local Emergency Planning Committee (LEPC)
North Central Behavioral Health System, Inc.
The Peoria Affiliate of Susan G. Komen for the Cure
Saint Francis Medical Center College of Nursing
Spoon River College
University of Illinois School of Medicine - College of Nursing
Canton Family YMCA
YWCA Canton

Fulton County Health Department
700 E Oak Street
Canton IL 61520

www.fultoncountyhealth.com

The Fulton County Health Department will provide comprehensive public health services to the residents of Fulton County through health promotion, prevention, and education activities. We will continue our efforts to identify the health needs of those we serve and facilitate the provision and access of services to meet those needs.

Our goal is to reduce the incidence of disease and increase public awareness of healthy lifestyles.
